ENGINEERED WOOD

ENGINEERED WOOD

Innovative collections that combine high quality **Italian natural woods**, enhancing the value of homes, hotels and any location where they are used. These natural woods serve as a refuge to find serenity and disconnect from the hustle and bustle of everyday life, providing a welcoming space to reconnect with nature and rediscover oneself.

Natural decorative patterns that adopt different conformations and shades, an imaginary immersion in nature, reinforcing feelings of calm and tranquility. **Handmade** collections characterized by the rustic flavor of non-homogeneous colors, embossed grain and worn knots restored with stucco, which emerge with their history. Wood floors that enhance the characteristics of wood.

The innovation lies in the fusion of the warm and natural surface of wood, traditionally associated with interiors, with ceramic stoneware elements, ideally suited for outdoor spaces, creating the perfect union of the two materials and the continuity of the flooring, eliminating the boundary between indoors and outdoors, unifying the spaces under the same design.

Lasting durability: Natural wood is synonymous with strength and longevity. With proper care, it endures over time, maintaining its beauty and functionality. A simple polish and it looks as good as new, just like the first day!

Nature-embracing texture: Connect with the essence of nature in every corner of your home or space. Natural wood brings a unique texture that creates a warm and inviting environment, providing a sense of tranquility and well-being.

Simplicity at every stage: From transportation to installation, natural wood offers a hassle-free experience. Its lightness and versatility make it easy to handle and work with, streamlining the construction process and ensuring impeccable results.

Inspiring sensations: Have you ever experienced the feeling of walking barefoot on natural wood? It's an incomparable experience. The diversity in colors and textures of each type of wood adds a unique touch to every step.
